

Cost of a standard power scale outdoor telecom cabinet in australia

Overview

Prices for outdoor telecom cabinets as of 2025 can run anywhere from \$900 to \$5,000, depending on design, materials, and integrated systems. Let's break that down: Why such a wide range?

Because not all cabinets serve the same function. Built for harsh Australian conditions, these weatherproof enclosures protect network and communication equipment from dust. At 4Cabling, our rack server outdoor enclosures and server cabinets are designed to protect your sensitive equipment from these harsh environments, with either an IP45 or IP65 rating to suit the level of protection you need. They can be configured for DC power, UPS, battery, or any other outdoor installation requiring robust protection for electronics equipment. A whole base station can be built inside our OutD cabinets. Our comprehensive range includes both vented and non-vented options, across 6RU, 9RU, 12RU and 18RU sizes. Every cabinet comes fully assembled and ready.
