

Dominican Energy Storage Wind Power

Overview

The Dominican Republic has launched a tender for up to 600 MW of solar and wind capacity, requiring projects to include at least four hours of battery storage to support stability in the National Interconnected Electric System (SENI). This ambitious goal, announced by Energy and Mines Minister Joel Santos, is a strategic response to. The Dominican Republic and its Unified Council of Distribution Companies (CUED) has unsealed the financial bids for a major public tender aimed at integrating up to 600 MW of new renewable generation into its national grid. The Superintendency of. The transformation of the energy sector is a collective initiative from the National Commission of Energy (CNE), Ministry of Energy and Mines (MEM), and Superintendency of Electricity (SIE) among other government institutions, all encouraged by the current administration.
