

Egypt builds energy storage power station

Overview

Dubai-based renewable energy developer AMEA Power has secured financing and commenced construction on what will become Africa's largest single-site renewable energy and battery storage facility, marking a transformative milestone in Egypt's clean energy transition. Egypt's clean-energy ambitions took a significant step forward after UAE-based AMEA Power signed agreements with China Energy Engineering Corporation (CEEC) and China Energy International Group (CEIG) to develop two large-scale battery energy storage projects and a battery manufacturing facility in. A transformative, dispatchable clean-energy asset integrating 1,000 MW of solar PV with 600 MWh of battery storage to meet Egypt's rising electricity demand. There will be a 500MWh BESS project located in Zafarana and a 1,000MWh BESS project located in Benban. The landmark \$700 million. Egypt is advancing its renewable energy strategy with a significant battery storage upgrade. The national grid will see a 1.5 GWh battery storage enhancement, facilitated by Amea Power's contracts with China Energy Engineering Corporation, Gotion, and Al Nowais Group.
