

Ess inc battery

Overview

specializes in the development and production of iron flow batteries, which are a type of long-duration energy storage solution. These batteries are unique due to their unlimited cycling capability and zero capacity degradation over a 25-year design life. ESS iron flow technology is essential to meeting near-term energy needs. As demands on. At ESS Tech, Inc. We deliver safe, sustainable, cost-effective, long-duration energy. Iron flow battery company ESS Tech Inc highlighted the potential of its recent partnership with Google and the acquisition of VoltStorage GmbH, as profitability remained out of reach in 2025. The Oregon, US-based technology firm, which owns the intellectual property for a proprietary flow battery. The NYSE-listed US company, which manufactures and holds the IP for a flow battery technology based on iron and saltwater electrolyte, has just announced its Q1 2025 financial results for the period ending 31 March 2025. This acquisition adds VoltStorage's portfolio of patents and technical development.
