

European photovoltaic panel price trend

Overview

Solar module prices in Europe have risen after months of decline, driven by price increases from Chinese manufacturers and a tight supply of popular modules in the European market. Updated guide to photovoltaic module prices shows current solar panel costs in Europe. High-efficiency modules have climbed to €0.115/Wp and are expected to rise further. How much do solar panels cost today?

How much do solar panels cost in January 2026?

How much do solar panels cost in. Every month we publish a current price index on the development of wholesale prices of solar modules. Starting February 2025, the coverage of 210mm p-type cells will be discontinued. TOPCon 210*210mm.

Summary: This analysis explores the current photovoltaic panel price trends in Europe, examining market drivers like raw material costs and policy changes. It includes detailed breakdowns for national average system costs for France, Germany, Italy, Spain and the UK across the three segments.
