

# How much is the price of the extra-long battery in the energy storage cabinet

## Overview

The price of Lithium Iron Phosphate (LFP) battery cells for stationary energy storage applications has dropped to around \$40/kWh in Chinese domestic markets as of November 2025. These cells are further integrated into battery enclosures, which house 5-6 MWh of cells in 20-foot. · Triple power at up to 30% lower cost - 2-6kWh expandable capacity to fit your energy storage needs. Add up to two DELTA 2 Max Smart Extra Batteries to gain a capacity of 6144Wh. Capex of \$125/kWh means a levelised cost of storage of \$65/MWh 3. With a \$65/MWh LCOS, shifting half of daily solar generation overnight adds just \$33/MWh to the cost of solar This report provides the latest, real-world evidence on. The cost of the lithium battery for an energy storage cabinet can range from \$5,000 to \$20,000, depending on various factors. These factors include capacity needs, specific technological features, and brand reputation. At that level, pairing solar with batteries to deliver power when it's needed is now economically viable.
