

How to make a battery cabinet for a battery pack

Overview

This video tutorial teaches you how to create a custom battery box, a useful tool for those who need to store spare batteries safely. The low tech part is the 25mm insulation board surrounding the battery cube held together by Velcro strips, so its quick to put together and quicker to tear apart. The board is sat on 45mm wool fibre and the lid is bordered with the same fibre. It prevents loss but can also be used to keep them in one place. If you need to use something that requires electricity without relying on a public power source, you definitely want to look into building yourself a DIY. Along with new, marine-grade wires and durable connections, we are building a DIY lithium battery to power the entire system. With the cells in hand and associated hardware all together, we are missing one final piece: the battery box. Battery boxes serve many purposes.
