

Is the rebate for photovoltaic panels true or false

Overview

The federal “rebate” for solar panels is actually the Residential Clean Energy Credit under 26 U. § 25D, which covered 30 percent of installation costs with no dollar cap. Find out which solar tax credits and rebates are still available in 2025 and what you need to claim them. The Residential Clean Energy Credit was a tax credit worth 30% of the gross cost of a solar project. Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. However, this credit is no longer available for systems installed after December 31, 2025, following changes enacted by the. Section 25D of the Internal Revenue Code provided a 30% nonrefundable tax credit for residential solar photovoltaic systems, battery storage, and geothermal heat pumps. It was scheduled to run through 2034.
