

Medical equipment battery custom manufacturer

Overview

For over 35 years, Excell Battery has been a leading OEM supplier of smart battery solutions for advanced applications, including critical Class I, Class II, and select Class III medical equipment: 1. Feeding Pumps 2. Imaging Equipment 3. Infusion Pumps 4. Insulin Pumps 5. Mobile Workstations/carts 6. Monitoring Systems 7. Oxygen Concentrators 8. R. Medical devices and equipment are critical to high-quality patient care and are designed to support battery energy sources for power backup, portability or mobility applications. As a result, the battery sources and management systems are vital components of any equipment for safe and reliable operation. As advancements in medical equipment require. Excell Battery has in-depth experience and expertise in assisting OEM design engineers to choose the right battery chemistry for their battery-powered devices. We produce battery solutions based on a range of chemistries from Li-ion to NiMH and conventional lead-acid options. Our engineers engage from the inception of the project to select the chem. Excell Battery works only with top-tier battery cell suppliers for the most advanced solutions to meet custom medical device requirements. We independently qualify all cells in our in-house test labs to guarantee that they perform according to their requirements. Excell Battery's Criterion technology meets the high availability and reliability required by medical devices by including smart battery management systems (BMS) that monitor state of health, report real-time status and manage safe operating conditions throughout the lifecycle of the battery packs. BMS for medical systems provides several benefits:.
