

Russia s new energy storage unit

Overview

Rosatom 06 June 2026 20:23 The fuel division of Rosatom (the management company is TVEL JSC) has put into pilot operation Russia's first "gigafactory" of energy storage devices, built in the Neman district of the Kaliningrad region. The production capacity of the industrial site is four. Russian specialists will create about fifty new types of equipment and components for energy storage units within the framework of the federal project on development of energy storage systems, department director at the Russian Ministry of Industry and Trade Mikhail Kuznetsov said at a press. Summary: This article explores the growing importance of underground energy storage systems in Russia, their applications across industries like renewable energy and grid management, and how innovative solutions like EK SOLAR's technologies are shaping a sustainable future. This was reported in the press service of the state corporation. The launch of the Kaliningrad "gigafactory" is an industrial. Recently sanctioned carrier Everest Energy, carrying a load of liquefied gas from Arctic LNG 2, has taken up position next to the world's largest floating LNG storage barge.
