

The battery in the car is dead

Overview

One of the reasons for an empty battery is human error. There are moments when you are in a hurry and forget to turn off the lights or close a door properly before leaving the vehicle. If the headlights stay overnight or for a few hours, they drain the battery, and your car battery will be dead in the morning. However, Did you recently install some external electronics to your car, like a car stereo or a GPS?

Then there is a chance that you wired these devices wrong. The alternator's job is always to charge the car battery while you are driving. If the alternator is starting to go bad, it may not charge the car battery. Many people do not use their car a lot. This causes your car to only being driven for short distances. As you might know by now, the alternator is. Was your car standing outside while it was freezing weather?

Car batteries can actually freeze if the weather is very cold. This especially happens if.
