

What communication base stations are there in Jordan

Overview

Jordan has a highly developed communications infrastructure. Jordan's telecom infrastructure is growing at a very rapid pace and continually being updated and expanded. Communications in Jordan occur across many media, including telephone, radio, television, and internet. Telephone 50% of households have at least one main line telephone. As of 2010, 103% of the population has a cell phone; 15%. 40% of Jordanian households have a PC. This is expected to double in the coming years when the government reduces the sales tax on PCs and internet service in an effort to make Jordan the high-tech capital of the Middle East. As of 2013, Internet penetration in Jordan was 63%. It was 50.5 percent by the end of 2011. Internet usage more than doubled from 2007 to 2009 with the rapid growth expected to continue.

Telecommunications Regulatory. The IT industry in Jordan in the year 2000 and beyond got a very big boost after the Gulf War of 1991. This boost came from a large influx of immigrants from the Gulf countries to Jordan, mostly from Jordanian expatriates. When ascended to the throne in 1999, he stated his intentions to turn Jordan into the high-tech capital of the Middle East and to create a Silicon Valley-like venture in Jordan. All Jordanian schools are
